

EXHIBIT B PRESERVATION GUIDELINES

McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES
664, 668, 670, 674 EAST MARKET STREET, HUNTINGTON, INDIANA

PURPOSE AND USE

The purpose of the following Preservation Guidelines is to establish a standard of appropriate physical design to improve and maintain a certain quality of a given Single-Site Historic District. The City of Huntington Historic Review Board realizes that these guidelines cannot cover every situation but will make every effort to work with you, the property owner, in achieving the desired goals while also preserving the historic integrity of the McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES Single-Site Historic District.

As the property owner of the McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES, you must apply for a Certificate of Appropriateness (COA) and the City of Huntington Historic Review Board must approve and issue the COA before the Building Department issues a building permit, or any work begins on any of the following changes to the property:

demolition, moving, additions, new construction, reconstruction, alteration, color change, or any conspicuous change in the exterior appearance of the existing building, including windows, doors and all exterior features, walls or fences

All work to the McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES should conform to *The Secretary of the Interior's Standards for Rehabilitation*. When considering a rehabilitation project, or any work to your property, consult the City of Huntington Historic Review Board staff first for free advice on proper methods and materials, answers to your "how to" questions and ways to save you money.

To apply for a COA or if there are any questions regarding these Guidelines or about work you wish to do to your building contact:

CHARACTER-DEFINING FEATURES

Character-defining features of the McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES are elements, which stand out and are important to the overall design of the structure and site. These include the simple footprint, limestone foundation, and hipped roof with link dormers. The Queen Anne detailing is also important to this home and should be preserved. These details include decorative wood molding around the windows and the vergeboard and brackets located at the roof line.

ENVIRONMENT

A. Plantings

Preserve mature plantings and treat with sensitivity whenever possible, unless they pose a potential threat to the preservation of the house. Appropriateness of new plantings should be based on the size at maturity at a particular location.

B. Site

Confine any parking areas to the rear of the houses. Keep exterior lighting around the front of the house low in intensity and designed to highlight exterior features. If considering fences, choose a slat, picket, or lattice design and keep the height under forty inches in the front yard and conform to current setback requirements.

EXISTING STRUCTURES

A. Building Materials

All attempts shall be made to retain exterior building materials. Deterioration of original wood materials shall be prevented through repair, cleaning and painting. Building materials that are deteriorated beyond repair and preservation shall be replaced with similar or like materials duplicating the original in design and style. If asbestos siding is removed, the wood siding underneath should be restored.

The original architectural detail around windows, porches, doors and eaves shall be preserved or replaced by replicas of the same design and materials when deteriorated beyond repair.

The limestone foundation of the buildings shall be maintained, tuckpointed and properly cleaned when necessary. Mortar joints shall be repointed only when there is evidence of moisture problems or when sufficient mortar is missing to allow water to stand in the mortar joint. Original mortar shall be duplicated in composition, color, texture, joint size and method of application and joint profile. Do not paint stone surfaces.

B. Paint Colors

Although paint colors are reversible and have no permanent effect and have usually changed many times throughout the history of a building, it is important in defining certain architectural styles and their elements. A paint palette of appropriate and pre-approved colors is available to the property owner for the McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES. The palette consists of various colors and groupings and is developed to assist you in choosing appropriate colors. When applying for COA, the palette will assist you to choose a color scheme that has already been approved by the City of Huntington Historic Review Board.

Repaint with colors commonly in use at the time the building was constructed. Consider using different shades of the same color when variation in color is desired, however there is a danger of the color scheme becoming too busy.

C. Roof and Roofing

The original roof shape shall be retained. Architectural features that give the roof its essential character, such as its shape, fascia, and dormers shall be retained. Nothing shall be done to change the essential character of the roof by adding architectural features or roofing materials inappropriate to the style of the building. The roof shall not be stripped of architectural features important to its character.

D. Windows and Doors

The windows and historic exterior doors, including sash, lintels, sills, and hardware shall be retained or replaced with replicas of the same design. If new sash and doors must be used, they shall replicate the original design and materials and should retain the original hardware. Original windows and doors should not be discarded when they can be restored and re-used in place. New window or door openings that would alter the scale and proportion of the building as viewed from the street shall not be introduced.

E. Entrances, Porches, and Steps

The porch that extends across the front of the houses shall be retained or, when deteriorated beyond repair, replaced with materials replicating the same design and dimensions.

F. Mechanical Systems

Required mechanical systems should be placed in areas that will result in not changing the appearance of the building. Early mechanical systems, including plumbing and early lighting systems should be utilized whenever possible. Holes should not be cut through walls in areas that can be seen from the street to accommodate an air conditioner or other mechanical equipment.

G. Accessory Buildings

Locate new accessory buildings in the rear and design so that materials and proportions are compatible with the existing house and landscape features.

NEW CONSTRUCTION

A. Height and Proportion

The height and proportion of an addition to the original building or separate building constructed on the site should be compatible with the original in regard to facade proportion and window patterns; size, shape and proportions of entrances and porch projections; and roof forms. Additions or new buildings that would add height or change the scale and architectural character of the original building should not be constructed.

B. Building Materials

Exterior materials used in additions or other new construction should be compatible in scale, texture, color and their visual characteristics with the building materials used in the original building.

C. Compatibility of Exterior Design

Additions and new buildings constructed on the site should be designed to be harmonious in style but visually different from the existing buildings. Contemporary designs that take into consideration the surrounding site, building materials, height and proportion of existing buildings (as described above) are encouraged. The style of additions and new construction will develop as a result of implementation of the aforementioned criteria.

ROUTINE MAINTENANCE

Every effort shall be made to keep the houses and grounds in a safe, neat and well-maintained condition. Normal measures of routine maintenance should be undertaken in order to ensure the preservation of the property.

PRESERVATION OBJECTIVE

The subject structure, exterior features of the site, and architectural and historic character thereof shall be preserved as a significant resource of Huntington and Huntington County according to the standards set forth above. The McLIN'S JEFFERSON STREET COVERED BRIDGE HOUSES is identified and designated as a Huntington Single-Site Historic District.
